A Profitable Partnership

Advantages of SaaS EDI

ALLiGACOM's EDI-Integrated Suite for SAP Business One is a fully hosted, seamless, and AS2 enabled solution that achieves the true optimization of business practices for which EDI has always been intended.

All mapping, trading partner management, testing, configuration, and 997 Functional Acknowledgement tracking are fully managed without the need for updates or patches to be purchased or installed by end users.

Full Data Integration

SAP Business One users' sales, invoicing, production, scheduling, and shipping data are all fully integrated and reconciled, eliminating any need for manual intervention.

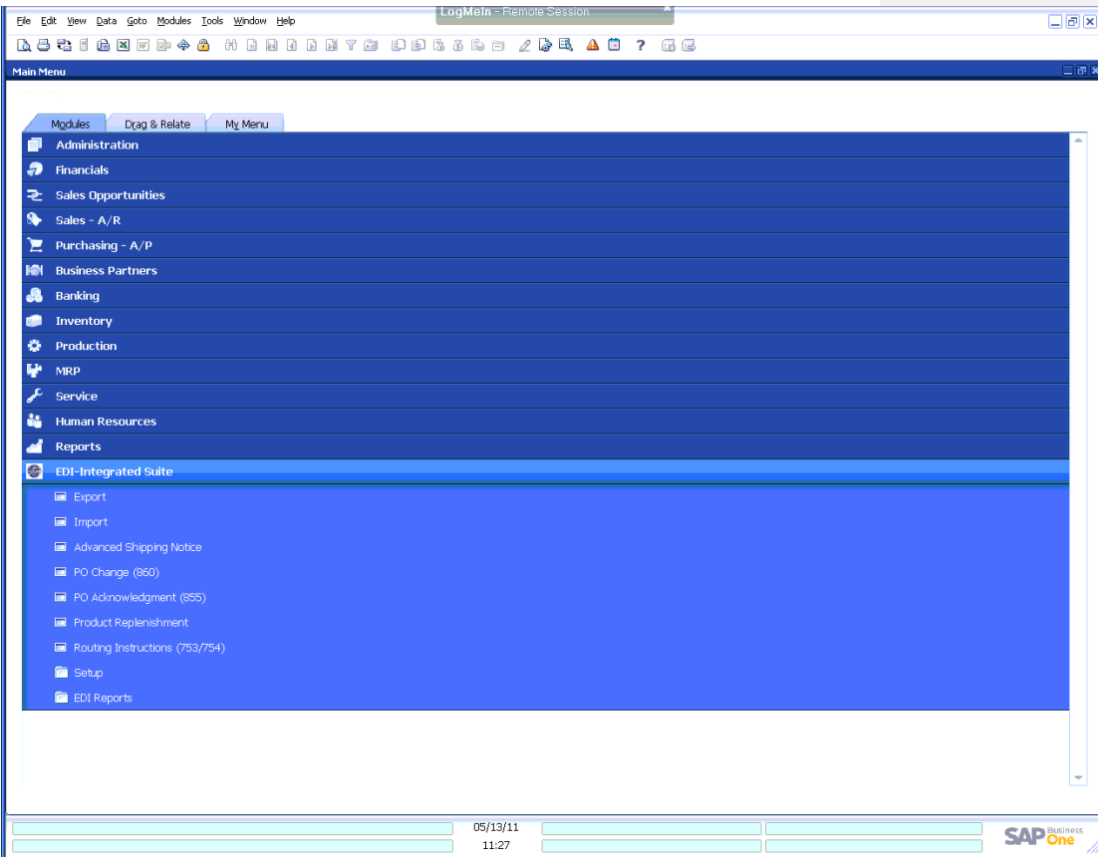

Comprehensive EDI data integration between SAP ERP and SAP All-in-One parent companies, subsidiaries, and divisions.

This integration greatly improves collaboration, visibility and optimizes processes in the supply chain. It promotes a **tangible Return On Investment** and radically changes the way organizations communicate and interact with each other.

Customer and Supplier Facing EDI

Capable of both customer and supplier facing EDI, SAP Business One enterprises can now cost-effectively implement an EDI program with their own suppliers by combining private network transmissions with a vendor accessible web portal. SAP Business One combines the substantial cost savings of a fully hosted EDI model with the technological capabilities of solutions that were until recently unavailable to small and medium sized enterprises.

Overview of ALLiGACOM's EDI-Integrated Suite

- ✓ MRP
- ✓ WMS
- ✓ Shipping
- ✓ Inventory
- ✓ Reporting
- ✓ Customer / Supplier EDI

A Single Environment

The EDI-Integrated Suite comes equipped with validation, automation, and reporting functionalities that have been designed with the user in mind and that enable SAP Business One users to take full advantage of the SAP platform.

Seamless data integration and embedded functionality allow all EDI related activities to be executed within the native end user environment of SAP Business One. Standard SAP Business One error notifications are employed to achieve seamless management by exception best practices.
